# About our sliding door wardrobes

## The important but wordy bit

- We've been selling these sliding doors since we started in 1998!
- They are more cost effective than fitted cabinet wardrobes as they use less material to manufacture and are faster to fit.
- We make them to the width and height your space needs
- The maximum door height 2450mm, for higher ceilings we make a taller pelmet (the profile that covers the top track in the same finish as the end panels)
- The weight of the door is carried on the floor and the top track prevents them falling over.
- Your existing wall and floor remains exposed. You might like to decorate before we fit.
- Existing coving and skirting board is left in place with end panels and L fillets cut around them.
- Existing carpet? The doors can be fitted on top of carpet but it's preferred to fit the wardrobes before carpets where possible. If we fit on existing carpets then, in the future, the carpet can be cut with a Stanley knife to remove it without removing the wardrobe.
- Below the track is an 18mm thick plinth that lifts the doors away from deep pile carpets
- There is no soft close mechanism on these doors. We've tried several but they all needed extra pulling force to open the doors. They had a tendency to lift the doors off of the track when closing with a force moderate enough to make having a soft close mechanism useful. We find that as adults we don't aggressively throw the doors into the wall, so soft close isn't adding anything useful for it's cost and limitations.
- The glass panels are safety backed and designed to flex significantly before they break. If they do break the safety backing will keep the cracked glass together.
- Our Swedish internal system allows for you to move the shelves, drawers and hanging rails around as your needs change. This is especially useful if you have growing children.
- Lead time - typically 4 weeks from when we confirm the measurements.
- Most wardrobes take 1 day to fit although the larger wardrobes can take 2 days.
- To fit the wardrobes the room should be empty of other furniture. Sometimes beds can be put on their side, but we'll need enough space to turn with a door that's 2.4m long and 1.2m wide
- Payment terms: 25% with order, balance once finished.
- We measure the room once an order is placed. If when measuring we discover the wardrobes won't fit (eg: the doors won't fit through the home) or you've made a mistake with the pricing (eg: the space is too wide for 2 doors and 3 doors will be more expensive) then you get a FULL REFUND.
- We can visit before you order to price for more complicated considerations (eg: moving electrical sockets or other related work).

# Interior layouts

- Every wardrobe includes double hanging.
- That's the width of your wardrobe twice, with hanging rails and shelves.
- Each section is around 61cm wide.
- One section is/can be reduced to use the maximum possible width but pull out drawers will not work in this narrower section
- The top shelf is typically set 2m high so you can store things above this within the wardrobe.
- The space between shelves for hanging shirts, etc is typically 1m for most people (it depends on your shirts!)

You can have these layouts without needing any more parts

Double hanging

Long Hanging

3/4 hanging (with a shelf above or below)

## Pull out Trouser Rail

The pull out trouser rail uses less height than hangers so you can fit 2 shallow drawers above it

## Pull out shoe tray

The pull out shoe tray is 10cm high, but your shoes will be taller, we suggest allowing a 30cm high space

## Pull out Drawer options

Drawers are 85mm, 185mm and 285mm tall. Think of them as shallow 10cm, Medium 20cm and Deep 30cm. Below the shelf set for double hanging, you have 90cm and you fit any combination of drawers.

EG: (1 x deep 30cm) + (2 x medium 20cm) + (2 x shallow 10cm) = 90cm

## Example Layout

combining long hanging, double hanging, half hanging over drawers

With any premium or coloured glass options £410 per door

## 5. Interior options

Included with every wardrobe;  
**Double hanging and 2 full width shelves**  
Each section is 61cm wide.

Where needed, one section is reduced in width to maximise the useful space in your wardrobe.

Pull out accessories fit the 61cm sections and you can easily move them around as your needs change over time  
Where there is a wall to one side and you have pull outs there will be space to clear the L fillets. The hook rack extra accessory is useful here
